Enjoy Summer, Wisely!

The sun is essential for life - UV light allows Vitamin D to bind calcium in the bones and also reduces the risk of osteoporosis in the elderly and prevents rickets in children. Some skin problems like Eczema and Psoriasis can actually improve in response to the sun. And here is a great benefit – the sun affects melatonin, a hormone that regulates our biological rhythm and lifts our moods! However, before venturing out into the sun, make sure you are well protected.
