

PRODUCT DATA SHEET

HYA-LURON LIFT – Night Wear

VISIBLE LIFT & ANTI-AGEING

Hya-Luron Lift / Night-Wear	Hya-Luron Lift is a rich synergy of skin revival ingredients and Hyaluronic Acid, formulated to reduce surface lines and support the natural collagen and elastin of the skin. With regular use, connective tissues are strengthened, smoothness is enhanced and the skin will be fully nourished, hydrated and refreshed. For best results, apply at night when the skin is most receptive. pH Balanced.
Benefits of Hyaluronic Acid	Hyaluronic Acid, also known as HA, is a natural compound found in skin. The loss of HA is one of the main causes of wrinkles. The benefits of HA include : <ul style="list-style-type: none"> • It is a magnet that attracts moisture up to 1000 times its weight • Provides cushioning of skin cells • Aids in tissue repair • Holds together the structural components of collagen & elastin • Creates a protective barrier against micro-organisms • The skin will look smooth, soft and younger
Fragrance	Typical of the NaturCare Range. Soft floral with light citrus undertone
Main Ingredients	Hyaluronic Acid, Aloe Ferox Gel, Vitamin A & E, Pro Vitamin B5, Wheat Protein, Wheatgerm, Witch Hazel, Evening Primrose Oil, Avocado Oil and Borage Oil.
Appearance	A soft white cream. Spreads easily and is fully absorbed. On application, the skin will immediately feel soft and smooth.
Directions for use	For optimum results, apply at night after cleansing. Massage gently with an upward motion into the facial and neck area. Pay special attention to the mouth and lip area, which have fewer sebaceous glands and are susceptible to becoming lined.
Packaging	75ml White Tube with clear flip-top lid. Remove tamper-proof seal.
Safety, Storage & First Aid	It is safe to use on most skin types. In the unlikely event of rashes or skin reactions occurring, stop using. Do not store in direct sunlight and keep out of reach of small children.

Notes: Hyaluronic Acid / HA is also known as hyaluronan or hyaluronate. It is a carbohydrate, or more specifically a mucopolysaccharide that occurs naturally throughout the human body. When not bound to other molecules, it binds to water giving it a stiff, viscous gel quality. Its function in the body is, amongst other things, to bind water and to *lubricate* the body, making it extremely beneficial in skin-care products. Hyaluronic Acid can be regarded as the water that keeps the collagen moist and elastic. Collagen is continuously surrounded and nourished by the gelatinous HA substance. Young skin is smooth and highly elastic because it contains high concentrations of Hyaluronic Acid, which helps the skin to stay healthy. As we grow older, the body loses its ability to maintain high levels of HA and the skin becomes drier. Hyaluronic acid acts as a *space filler* by binding to water and thus keeping the skin smooth and wrinkle-free.
