MOZZIE GO

INSECT & MOSQUITO REPELLENT

<p>Species</p>	<p>Mosquitoes are members of the fly family of which there are about 3000 varieties and the danger factor depends on the particular area or species of the mosquitoes. The female life span can be measured in terms of weeks and months, while the male typically lives for only a week. Only the female draws blood which she needs to make eggs.</p>
<p>Health Threats</p>	<p>The mosquito is one of the most dangerous creatures on this earth! The diseases that they spread have been responsible for killing more people than in all the world wars! In some areas the threat of developing brain related infections i.e. Meningitis and Encephalitis is even greater than getting Malaria. The effect differs from person to person.</p>
<p>Itchiness</p>	<p>Apart from their itchy bites they can transmit viruses, bacteria and parasites. They can create havoc as they draw blood with six needle type sharp tips and simultaneously inject saliva which contains proteins which are foreign to the body. The immune system fights back by releasing Histamines and in turn causing itchiness, inflammation and even swelling. Most importantly is do not scratch - this causes the skin to become even more inflamed and there is the risk of breaking the skin causing the itching sensation to increase and leaving the skin vulnerable to infection.</p>
<p>Prevention</p>	<p>Eliminate all breeding areas as much as possible by ensuring there are no containers lying around with stagnant water. Even the water in the bird bath should be changed regularly. Hundreds of eggs can hatch in just a spoonful of water! These irritating insects can cause absolute havoc by robbing the pleasure of outdoor eating unless you take the necessary precautions. A good idea is to plant these perennials next to the patio - Scented Geraniums, Rosemary and Lavender, they avoid these plants.</p>
<p>Mozzie Go</p>	<p>Incorporates extracts of South Africa's indigenous plants that will naturally repel mosquitoes and insects. It is not harmful to the environment and can be sprayed on surfaces and the skin. If bites do occur, apply Aloe Gel to bring relief and eliminate the effects of the bite.</p>
<p>Ingredients</p>	<p>Aqua, Denatured Spirits, Biocide, Propylene Glycol, Polysorbate, Extracts of Citronella, Lemon Grass, Khakibos, Rooibos & Aloe Ferox.</p>
<p>Packaging</p>	<p>150ml White Spray Bottle</p>
<p>Precautions</p>	<p>Do not spray near open flames or directly on to food. Keep out of reach of children. If swallowed, do not induce vomiting. Seek medical help.</p>
